OASIS Front Bar Connector
Replacement Instructions
* HELPER NEEDED *

Tools Needed: ½” Wrench or Socket, 5 mm Allen Wrench, Pencil, Phillips Screwdriver.

Parts Supplied: (1) Front Bar Connector, (2) White Nylon Bushing, (1) Flat Washer, (1) Lock Nut.

WARNING: FAILURE TO FOLLOW THESE INSTRUCTIONS CAN RESULT IN PERSONAL INJURY!! PLEASE READ THESE INSTRUCTIONS IN ITS ENTIRETY BEFORE ATTEMPTING TO COMPLETE THIS PROCEDURE.

1. Open the OASIS Awning all the way. See Figure 1.

2. For Motorized OASIS, unplug the Motor.

3. Using the Crank Wand (see Figure 2), continue to open the OASIS until the Lateral Arms are completed extended, the Fabric begins to sag and the Roller Bar is exposed. Note: This safely ensures tension is relieved from the Lateral Arms, before disconnecting them from the Front Bar.

4. Using the Pencil, mark on the Front Bar the location of the existing Front Bar Connector (see Figure 3), so the new Front Bar Connector will be installed in the same location.

5. Using the Phillips Screwdriver, remove the Front Bar End Cap closest to the Front Bar Connector to be replaced. See Figure 4.

6. You must have your helper hold the Front Bar stable, while you perform the rest of this replacement procedure.

7. Using a ½” Wrench or Socket, remove the Lock Nut attaching the Lateral Arm to the Front Bar Connector. See Figure 5.

8. While your helper holds the Front Bar steady, separate the Lateral Arm from the Front Bar Connector. See Figure 5.

9. Using a 5 mm Allen Wrench, loosen the two Allen Head Bolts attaching the Front Bar Connector to the Front Bar. See Figure 5.

10. Slide the Front Bar Connector out of the Front Bar.
11. Slide the new Front Bar Connector into the Front Bar, aligning the position with the pencil marks where the original Front Bar Connector was attached.

12. Using a 5 mm Allen Wrench, tighten the Front Bar Connector to the Front Bar. See Figure 5.

13. Slide one replacement White Nylon Bushing over the Threaded Connector (with the flat side facing up) onto the Front Bar Connector. See Figure 5 for orientation of the White Nylon Bushing.

14. Connect the Lateral Arm to the Front Bar Connector. The narrow part of the White Nylon Bushing fits into the opening of the Lateral Arm.

15. Slide the other replacement White Nylon Bushing over the Threaded Connector (with the flat side facing down). The narrow part of the White Nylon Bushing fits into the opening of the Lateral Arm. See Figure 5.

16. Slide the Flat Washer over the threaded part of the Front Bar Connector and hold in place. See Figure 5.

17. Attach the Lock Nut over the threaded part of the Front Bar Connector. See Figure 5.

18. Tighten the Lock Nut with a ½” Wrench or Socket.

19. Attach the Front Bar End Cap. See Figure 4.

20. Your helper can release the Front Bar.

21. For Motorized OASIS, plug in Motor.

22. Test for proper operation.
